ABOUT US

DISCOVER THE FIRE WITHIN.

Profound and primal ignite at the fireplace.

Ortal is the world's premiere designer and builder of high-quality contemporary gas fireplaces. For over 30 years, we have designed our fireplaces to meet the most stringent requirements of architects, designers, builders, and home and business owners – exceeding the expectations of our worldwide customers and the architectural design industry. Our reputation is built on the uncompromising quality of our materials, finish, and safety standards, along with extraordinary ease of installation and end-to-end service. Patented features ensure that our fireplaces have the ultimate flexibility, safety, and comfort. And we are deeply committed to expert support for our customers, builders, and industry partners.

 **GREEN STATEMENT:** Ortal offers a green, environmentally friendly heating solution for the modern era. Our unique design maximizes the fireplace's radiant heat. This is combined with additional efficiency components including the use of direct vent technology, electronic ignition instead of a standing pilot, and low maintenance requirements. Finally, with our high efficiency ratings and contemporary designs, form need never be sacrificed for function.

Talent is a flame.
Genius is a FIRE

Bernard Williams

THE WILDERNESS COLLECTION

INSPIRED BY NATURE

Deeply inspired by nature, Ortal has taken the best of the great outdoors, and channeled it to create a new standard of fireside experience. The Wilderness collection combines cutting-edge ceramic log technology with an idyllic, soothing look that invites quiet contemplation and rich, warm memories.

THE WILDERNESS BURNER

At Ortal, we know that since the start of civilization, humans have sat around the hearth, lost in thought while watching the flames flicker. Art, language, philosophy, faith, technology, and personal evolution have all come to life there – within that primal spirit around the fireplace.

For our Wilderness Burner technology, we set out to perfect a blaze with the look and feel of logs and that authentic hearth fire. The result is a unique fireplace experience that can integrate with our various features and forms, and let you feel like you're traveling back through time to the deepest of inner awakenings.

Modular 130X2

HEAT BARRIER SOLUTIONS

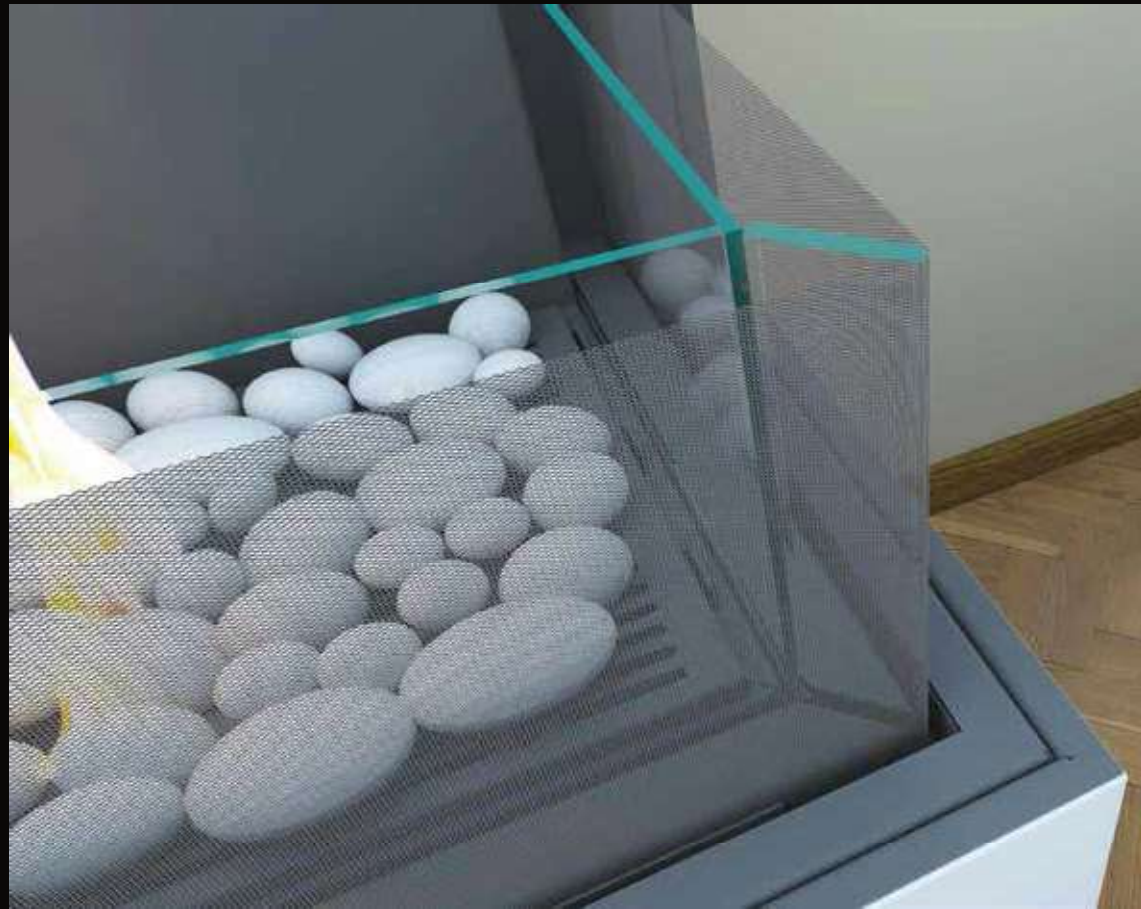

DOUBLE GLASS (FAN ASSISTED)

Portal's Double Glass solution is comprised of a double-paned glass enclosure with a thin ventilation layer in between and a series of small, silent fans circulating cool air between the two layers. Safer, more efficient, and more effective with its ambient heat.

A 120-volt, 15-amp, 2-gang outlet is needed to operate the double glass system.

PATENTED TECHNOLOGY

DOUBLE GLASS

COMPLETE FLEXIBILITY

Can be applied to many of our models, giving you a wide design selection.

SEAMLESS DESIGN

Uses a clean, frameless design without unsightly metal corners or seams.

COMPLETE COMPLIANCE

Maintains the latest regulatory standard of less than 172° F.

HEAT DISTRIBUTION

Innovative technology comfortably distributes the majority of heat at the ceiling level.

HIGH QUALITY GLASS

The extra layer of glass is so clear that it is unnoticeable and provides total transparency.

CONVENIENT

Easy to operate and nearly silent.

SCREEN

Ortal's standard heat barrier is a frameless screen, comprised of a nearly transparent metal mesh that sits in front of the fireplace's glass enclosure and acts as a protective physical barrier. This patented technology provides a complete solution and strictly complies with regulations.

COMPLETE FLEXIBILITY

Can be applied to many of our models, giving you a wide design selection.

SEAMLESS DESIGN

Uses a clean, frameless design without unsightly metal corners or seams.

LONG-LASTING DURABILITY

Using the highest quality materials available, your screen will stand the test of time.

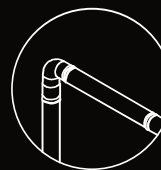

OPTIMAL SCREEN

The screen is so fine, it's almost invisible, preserving the fireplace's view and design.

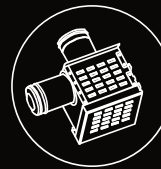

THE POWER VENT SYSTEM

Ortal's Power Vent System creates a mechanical draw on the fireplace exhaust, making longer vertical and horizontal venting pathways possible. This means the fireplace is no longer dependent upon conventional venting pathways and can be installed more flexibly at varied locations in the building. It is one of the industry's most sophisticated technologies.

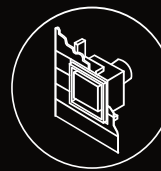

THE FLEXIBILITY OF THE ORTAL POWER VENT

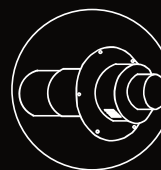

Ⓐ 3"x5" CVS Power Vent Pipe

Ⓑ Inline-90 Power Vent

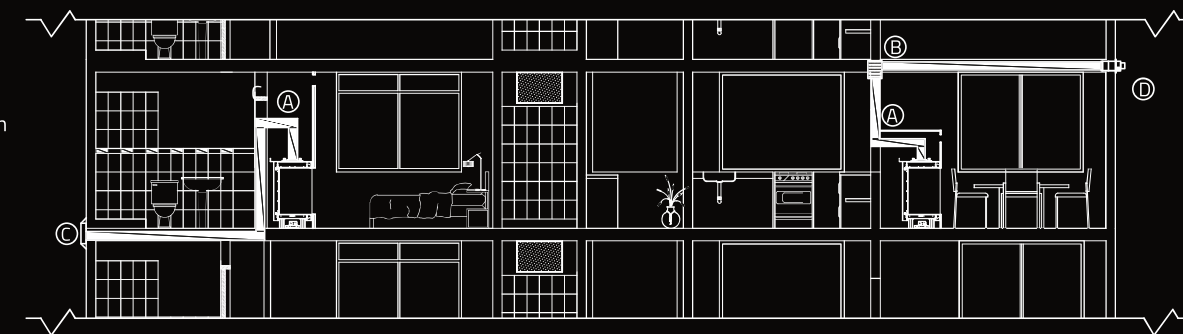

Ⓒ Flush Horizontal Termination Power Vent

Ⓓ Horizontal Termination

Ⓔ Vertical Termination

ADVANTAGES OF THE PORTAL POWER VENT SYSTEM

Inline-90 Power Vent System

- Allows for both horizontal and vertical termination.
- Accommodates vent runs up to 165 feet in length.
- Allows up to twelve 90-degree elbows.
- Smaller pipe size (5-inch diameter).
- Allows up to 20 feet of downhill run.
- Power vent fan is incorporated into the run as one of the 90-degree elbows.
- Power vent fan must be installed at least 8 feet of vent pipe from the fireplace.
- An access panel at the power vent fan is required for servicing.

Flush Horizontal Termination Power Vent System

- Allows for horizontal termination only.
- Accommodates vent runs up to 165 feet in length.
- Allows up to twelve 90-degree elbows.
- Smaller pipe size (5-inch diameter).
- Allows up to 20 feet of downhill run.
- Power vent fan acts as the termination cap and sits flush with the outside wall.
- Power vent fan must be installed at least 8 feet of vent pipe from the fireplace.
- An access panel at the power vent fan is not required for servicing.

Inline-180 Power Vent System

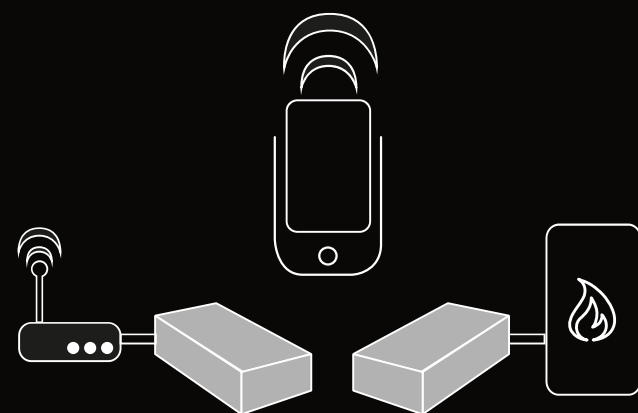

- Allows for both horizontal and vertical termination.
- Accommodates vent runs up to 165 feet in length.
- Allows up to twelve 90-degree elbows.
- Smaller pipe size (5-inch diameter).
- Allows up to 20 feet of downhill run.
- Power vent fan is set on a 180-degree angle, allowing for installation at any straight portion of the vent run.
- Power vent fan must be installed a minimum of 8 feet of vent pipe away from the fireplace.
- An access panel at the power vent fan is required for servicing.

Vertical Power Vent System

- Allows for vertical termination only.
- Accommodates vent runs up to 165 feet in length.
- Allows up to twelve 90-degree elbows.
- Smaller pipe size (5-inch diameter).
- Allows up to 20 feet of downhill run.
- Power vent fan acts as the termination cap.
- Power vent fan must be installed at least 8 feet of vent pipe from the fireplace.
- An access panel at the power vent fan is not required for servicing.

SMART HOME CONTROLS

Ortal Fireplaces are at your fingertips. Control your fireplace with the MyFire® app on a mobile device, using the Mertik SYMAX system that is configured with your home wireless internet

INTERIOR FIREPLACE MEDIA

With over 30 different interior design media options, the Ortol fireplace can be customized to meet your exact design needs, including log sets, branches, ceramic stones, polished glass, and interior panels.
